

Graphing Practice – Part 2

Factor each expression, then determine the **x-intercepts**, **y-intercept**, **axis of symmetry**, and **vertex**.
Use this information to graph the parabola on the grid provided.

1. $y = x^2 + 6x + 8$

2. $y = x^2 - 2x + 3$

3. $y = x^2 - 9$

4. $y = x^2 - 3x$
