

Metric-Imperial Conversion Practice

1. Which is shorter – Toronto to Winnipeg (2250km) or to Miami (1350 mi)?
2. At Metric Burger, you can get the “150-grammer” cheeseburger. Does this contain more or less beef than a “quarter-pounder”?
3. A hot day in Arizona can see temperatures hit 104°F. What temperature is this in Celsius?
4. A league is about 3.5 miles. How many kilometres is 20,000 leagues?
5. Ben is on a road trip in the U.S. He fills up at a gas station charging \$3.48 / gal. How much is this in ¢ / L?
